

Description

- Functional pneumatic braking system truck and trailer
- Functional truck and trailer ABS system based on the real WABCO components
- 6 measuring gauges for truck lines and 3 for a trailer
- Number of the component same like on the real vehicles
- ABS sensors on truck and trailer
- Diagnostics and faults simulation

Description

- Fully functional system based on the real components
- Functional truck and trailer ABS system based on the real WABCO components
- 6 measuring gauges for truck lines and 3 for a trailer
- Number of the pneumatic component same like on the real vehicles
- Truck Airbrake Trainer AT0037 is installed in a mobile aluminum frame. This training board simulator is specially designed to help technical students understand truck and trailer pneumatic systems. The educational training board is based on OEM components. The training board-simulator is a great educational tool that allows students to learn the truck and trailer airbrake system, study its components and operation modes, perform various measurements, tests, and other diagnostic procedures. Equipment for technical and vocational Tesca education and training.

Technical Specifications and Functions

- A fully functional system based on the real components
- Functional pneumatic system truck and trailer
- 6 measuring gauges for truck lines and 3 for a trailer
- Number of the pneumatic component same like on the real vehicles
- ABS sensors on truck and trailer
- Diagnostics and faults simulation

*Air compressor sold separately

Tesca training equipment is a great tool for professional teachers and technicians that helps explain to students of technical subjects how processes in Truck Airbrake Educational Trainer AT0037 with ABS operate and its technology.

Equipment for technical and vocational Tesca education and training.
