

Magnification Options

1. 10X Magnification

- **Usage:** Ideal for detailed inspection and measurement tasks requiring moderate magnification.

2. 25X Magnification

- **Usage:** Suitable for precision applications where higher magnification is necessary for accurate analysis.

3. 50X Magnification

- **Usage:** Provides maximum detail for high-precision inspections and measurements.

Measurement Capacity

1. Linear Measurement

- **Range:** 0 - 25 mm
- **Resolution:** 0.001 mm
- **Applications:** Accurate measurement of linear dimensions and profiles.

2. Angular Measurement

- **Range:** 0 - 360°
- **Resolution:** 1 minute of arc
- **Applications:** Precision measurement of angles and angular profiles.

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.

Functions

- **Profile Inspection:** High-resolution examination of profiles for quality control and detailed analysis.
- **Template Inspection:** Verification of templates against design specifications.
- **Precision Measurement:** Accurate length and angle measurements for quality assurance and engineering applications.
