

**Description**

- Fiat chassis with front-drive 4 cylinders, 1200 cm<sup>3</sup>, petrol, electronic injection MPI (Multi-point)
- Gearbox: 5 forward speeds + reverse+ differential
- Double circuit brake system with servo brake
- Front-disc brake, Rear-drum brake, Working front and rear light system controlled by a dashboard

This cutaway model is carefully sectioned for training purposes, professionally painted with different colors to better differentiate the various parts, cross-sections, Lubricating circuits, fuel system, cooling system, etc. Many parts have been chromium, plated, and galvanized for longer life. The engine operates electrically at 220 volts and runs at a reduced speed to let the student easily understand and observe the operation of the various mechanical parts. The chassis trainer and the cutaway components are mounted on the stand with the wheels.

Equipment for technical and vocational Tesca education and training.

Tesca training equipment is a great tool for professional teachers and technicians that helps explain to students of technical subjects how processes in Standard petrol multi-point engine chassis with working light system chassis Educational Trainer AT0296 Tesca operate and its technology.

Note: Specifications are subject to change.
