

Our small-scale 200kg/hr processing plant is designed to cater to small batch sizes without compromising on quality, making it ideal for processing short harvest season fruits with ease.

Crafted to Surpass Industry Standards:

- Our solution is engineered to surpass industry standards, offering unparalleled performance across a wide range of applications, from beverages to dairy and sauces, leveraging advanced aseptic technology.

Highly Efficient Heat Exchange:

- Our technology ensures efficient pasteurization/sterilization while minimizing impact on product quality (organoleptic and nutritional properties).

Automated Systems:

- Includes full automatic monitoring, traceability, and Cleaning in Place (CIP) for optimal hygiene and efficiency.

Note: Specifications are subject to change.
