► Battery Operated Dent Puller

Part of the SMART REPAIR range, products designed to increase the efficiency and quality of bodywork.

This spot-welding machine is a source of battery-powered mobile energy, created specifically to repair dents on the bodywork of a vehicle, via manual traction of the specific electrode (tip) welded on the sheet metal.

Lithium battery spotter best suitable for all straightening processes of steel sheets.

► Technical Specification

Input supply	: 1 Ph, 240 V, 50 Hz
Peak spot welding current	: 2800 A
Protection degree	: IP 20
Dimension	: 502 x 87 x 229 mm
Unit weight (approx.)	: 2.3 kg

► Scope of Supply

- Battery Puller unit with Lithium powered battery
- Power supply set with Allen key
- Plastic professional carry case
- User manual

► Benefits
