

STPD Aseptic Machine Innovative Design for Superior Pasteurization and Sterilization

Comprehensive Solution:

- Capacity : Processes 500-800 kg/hour.
- Application : Ideal for fruit and vegetable pulp pasteurization or sterilization.

Highly Efficient Heat Exchange:

- Efficiency : Ensures effective pasteurization/sterilization.
- Quality Preservation : Minimizes impact on organoleptic and nutritional properties.

Automated Systems:

- Monitoring : Full automatic monitoring for seamless operation.
- Traceability : Ensures complete traceability of the process.
- Hygiene : Features Cleaning in Place (CIP) for optimal hygiene and efficiency.

Specifications:

- Capacity : 5 ton/day.
- Material of Construction : High-quality Ss304.
- Dimensions : 40' x 8' x 8'.
- Power : 13 kW, available in 3-phase/Single-phase options.

Note: Specifications are subject to change.
