

**Description**

The gearbox is composed of a central box containing 4 forward speeds gearings and 2 reverse speeds gearings, an epicyclic unit for selecting the speed-gears mounted on the base, and an over-gear on top. The over-gear allows dividing each gear into slow or fast obtaining 16 forward gears which can be inserted and geared down in sequence.

- Heavy vehicles gearbox
- With the possibility of selecting any speed
- Operated manually through a hand wheel;
- Gearbox cutaway model on stand with wheels;
- Weight approx. – 400 kg

Equipment for technical and vocational Tesca education and training.

Note: Specifications are subject to change.
